Michell's

**Lawn Seed
for that Green Velvety Look**

"Green Velvet"

A Very Special Michell Mixture

For permanence and beauty there is none better than the Green Velvet lawn. This is our most popular and widely planted mixture, and scores of home owners have the "best lawn in the block" as a result of sowing only Green Velvet. It is combined of the finest perennial lawn seeds, especially recommended for the open, sunny lawn and will produce a closely knit, weed free turf of lustrous green velvety appearance, sturdy enough to withstand constant use. **Lb. \$1.80, 3 lbs. \$5.25, 5 lbs. \$8.70, 10 lbs. \$17.00, 25 lbs. \$42.00, 100 lbs. \$165.00.**

"Evergreen"

Recommended to fill the requirements of the average lawn. This mixture will produce a very desirable turf of fine-bladed, hardy grasses, capable of withstanding considerable wear and periodic dry spells. **Lb. \$1.45, 3 lbs. \$4.25, 5 lbs. \$6.95, 10 lbs. \$13.60, 25 lbs. \$33.25, 100 lbs. \$130.00.**

"Shaded Lawn"

A mixture of shade-tolerant grasses that will produce a perfect sward in areas receiving little or no direct sunlight. Such locations present problems other than lack of sunlight. Soil should be checked for drought and acidity. Other principles to be observed include periodic fertilization. **Lb. \$1.35, 3 lbs. \$3.95, 5 lbs. \$6.45, 10 lbs. \$12.60, 25 lbs. \$30.75, 100 lbs. \$120.00.**

MERION BLUEGRASS

This is not a mixture but 100% pure Merion Bluegrass. Withstands heat and dry spells and bears up under close mowing. One pound will cover 750 sq. feet and will develop into a very dense and vigorous turf. Supply still very limited, send immediately while seed is available. **½ lb. \$3.00, Lb. \$5.00, 5 lbs. \$24.75, 10 lbs. \$49.00.**

Over 60 years of experimenting enables us to offer mixtures that meet the rigid specifications of highest purity and germination. We recommend sowing 5 lbs. per 1,000 sq. ft. on ground without grass and half that quantity for renovating lawns. For full information regarding the proper care and seeding of your lawn send for our free booklet "Lawn Pointers."

Your lawn needs proper care and proper food. See pages 76 to 81 for fertilizers and lawn equipment.

STOCKS

Trysomic Giant Imperial Mixed

This is the first Trysomic Stock ever offered. Based on studies commenced by Dr. H. B. Frost at Cornell University in 1915 and furthered through the 20's, the genetic theory of Trysomic doubles in Stocks was developed and proved by 1930 to be capable of producing 85% doubleness from seed.

The Trysomic Stock offered produces 85% or more double flowering plants when sown from seed. In addition to this desirable trait, the percentage of any planting can be increased up to 100% at the four-leaf seeding stage as at this period of growth the young singles are noticeably weaker and can be readily distinguished from the vigorous double flowering plant. Michell's Top - Quality Dahilas

Time of SHIPMENT: Unless specially requested, tubers will be shipped March 15 to June 1; plants, May 15 to June 15.

CULTURE: Dahlias are at their best during the latter part of September or early October. To get exhibition blooms, disbud plants up to August 1. Spade or plow the soil 1 to 1½ feet deep; fertilize with manure or Hyper-Humus; scatter about ¼ pound of bone-meal around each hill when planting. If soil is very heavy, incorporate a liberal quantity of granulated peat moss. About August 1, apply about ½ pound bonemeal to each plant and work in thoroughly; sheep manure can be substituted for bonemeal at this time to good advantage.

How to Keep Dahlia Tubers After They Are Shipped to You If Too Early to Plant

Open package and allow tubers to remain in packing material. Do not expose to air or moisture too much; keep in a cool place, but not where they will freeze.

Gloxinias

Culture for Gloxinias

Start bulbs in 4-inch pots using a mixture of leaf mold, sand, and a little well-rotted cow manure. As the leaves appear keep shaded and be very careful with the watering. Examine each plant and do not water unless they appear dry. Keep leaves dry although on a hot day they may be moistened early in the morning, but do not wet them every day. While they want a little shade do not overdo it or you will get all foliage and no flower. May also be planted directly outdoors in a sheltered spot as soon as all danger of frost is over.
